Preface

The First International Conference on Materials Engineering and Sciences (IConMEAS 2018) taking place in Istanbul Aydin University, Istanbul - Turkey during August 08-09 2018 was organized by Eman Research Center – Australia, in cooperation with the two institutions: University of Zakho – Iraq, and Universiti Malaysia Perlis – Malaysia.

The conference addressed the important theme in supporting the sustainable development: “*Insight on the Current Research in Materials Engineering and Science*”. The objective of the IConMEAS 2018 was to gather researchers, scientists, educators, scholars, professionals, and students in different fields related to materials engineering and science and beyond to exchange ideas, share knowledge, and explore possibilities of building cooperation networking.

The Proceedings of the conference consist of all accepted papers and presented by researchers/presenters from different countries, such as Iraq, Malaysia, Turkey, USA, UK, Iran, Japan, Algeria, Russia, Poland, and Oman.

It is fair to conclude that the conference was a great success! Big numbers of researchers, scholars and professionals have contributed to turn this event into a smoothly running meeting with interesting presentations and excellent environment for discussion and networking.

I would like to take this opportunity to express my deep gratitude to the president of Istanbul Aydin University “Dr. Mustafa Aydın” for his endless support to the conference. I would also thank the members of organizing committee, sponsors, keynote speakers, reviewers and participants who have made this event success.

We sincerely hope this conference (IConMEAS 2018) would provide a good opportunity to share knowledges, ideas and experiences as well as to establish new academic collaborations among participants leading to exchange program and joint research and publication for the benefit of all.
